
Week 10 Class Diagram

— Group 5 —

FileViewer

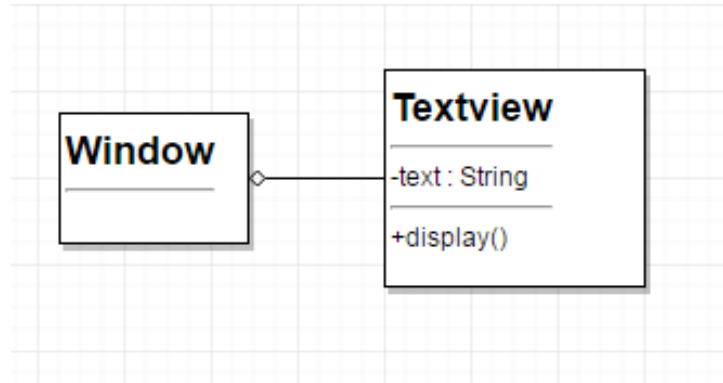

Requirements Statements

In FileViewer,

- * We have a TextView object that displays text in a window.
- * TextView has no scroll bars by default, because we might not always need them.
- * We can also add a thick black border around the TextView.
- * It is highly likely that we will support various file formats for display in the future.

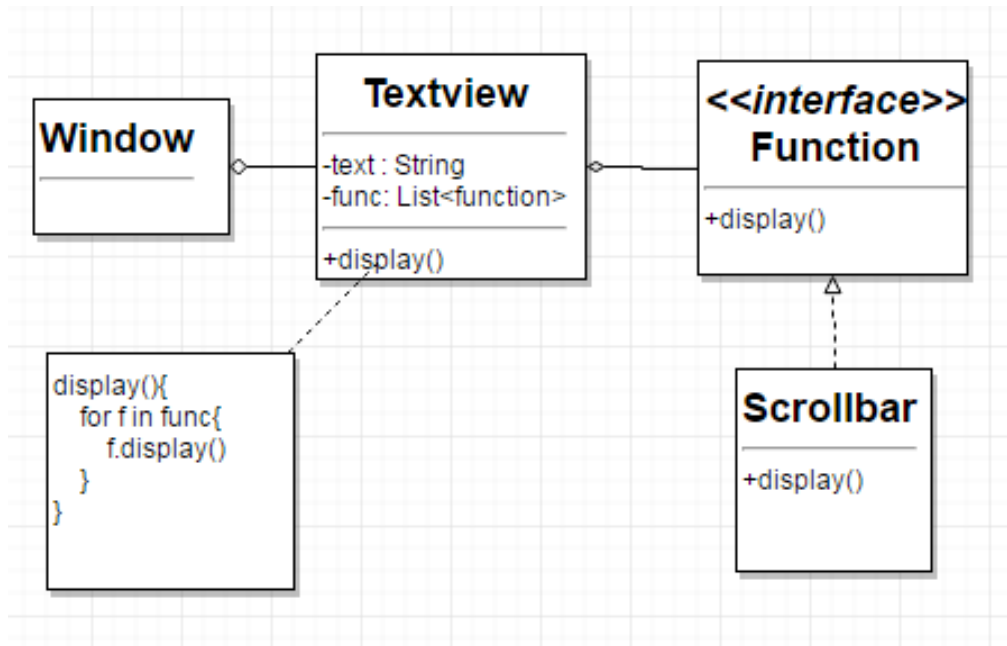

FileViewer₁

We have a TextView object that displays text in a window.

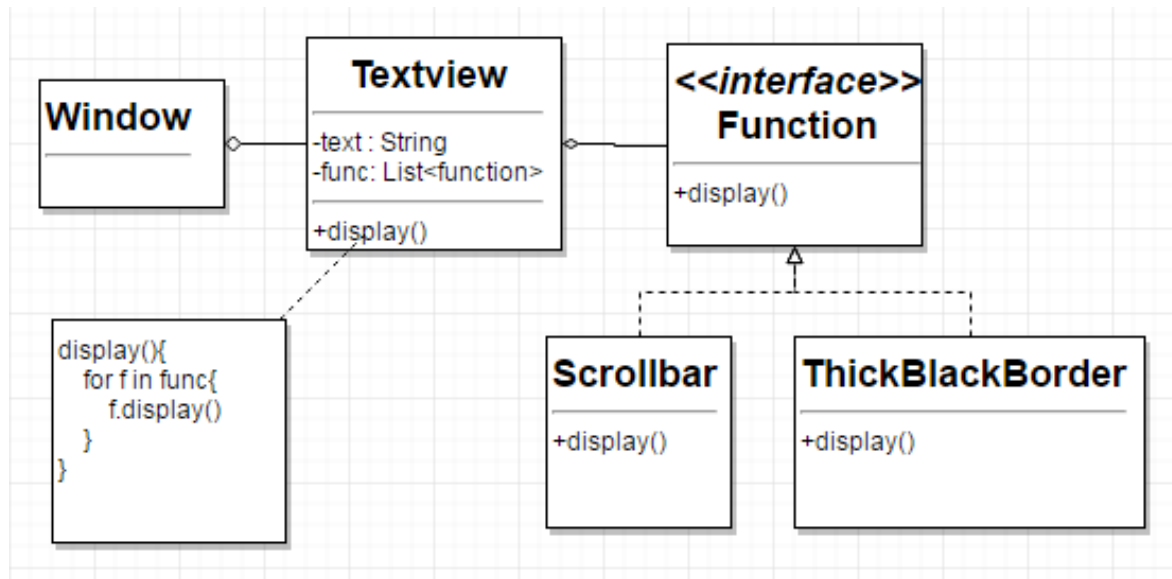

FileViewer₂

TextView has no scroll bars by default, because we might not always need them.

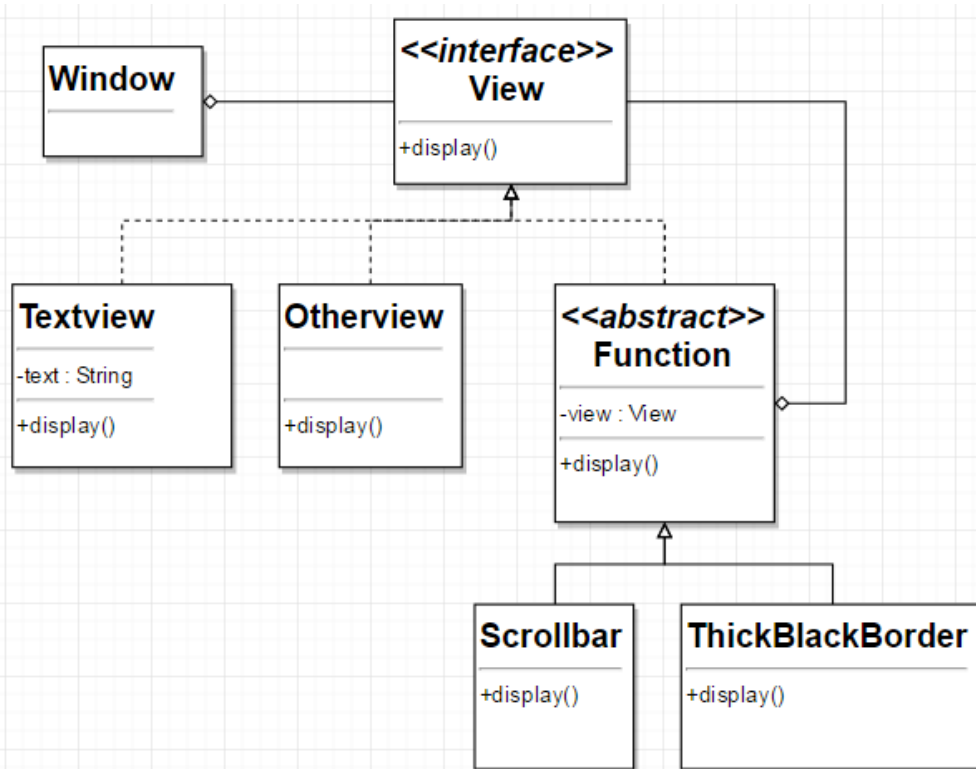

FileViewer₃

We can also add a thick black border around the TextView.

FileViewer₄

It is highly likely that we will support various file formats for display in the future.
